Let's Get Technical

CONSTRUCTION

The **Flame Free™ Thermo-Urn™** was introduced in 2010, making a huge impact on beverage service everywhere. The redesigned base with interlocking legs attaches directly to the body of the urn, giving it a seamless look while providing additional stability to the unit. Our urns complement any space and create the most elegant self-service beverage setups. Available in 1.5-, 3- and 5-gallon capacities with a polished or brushed stainless steel finish.

QUALITY

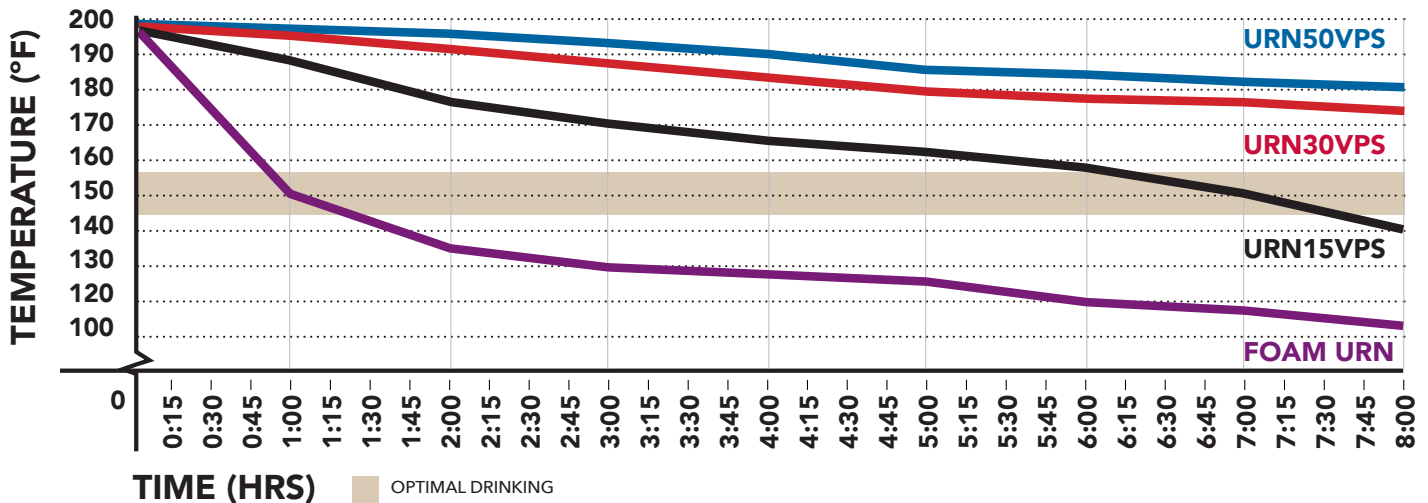

We meticulously test each urn to ensure optimal performance. Compared to an industry standard 3-gallon urn with foam insulation, our **Flame Free™ Thermo-Urn™** outperformed the competition every time. During testing, each urn was filled with water between 195°F and 203°F to emulate standard brewers. Notice how the foam urn dramatically drops in temperature at the two-hour mark in the chart shown.

VALUE

With a **Flame Free™ Thermo-Urn™**, you could end up saving yourself hundreds of dollars each year and receive a return on your investment in a matter of months.

PERFORMANCE

Optimal drinking temperature of coffee is 155°F–165°F. Even after six hours, all of our **Flame Free™ Thermo-Urns™** are well within or above optimal drinking temperature range, while the foam urn falls below after just one hour.

FLAME FREE™ THERMO-URN™

A SERVICE IDEAS EXCLUSIVE PRODUCT

Engineered to achieve true vacuum insulation that provides six+ hours of heat retention with no external heat source. This economical design significantly reduces labor and supply costs and has the potential to save you hundreds of dollars a year. You could receive a return on your investment within a matter of months! Furthermore, without the need for direct heat, your coffee will taste fresh until the last cup is poured.

FEATURES

- 1. Interior Splash Guard** Stainless steel splash guard prevents splashing while brewing directly into the unit
- 2. Lid Knob** Polished stainless steel knob
- 3. Lid** Foam insulation and rubber gasket creates superior suction to prevent heat loss
- 4. Handles** Polished stainless steel
- 5. Body** Constructed from 18/8 Stainless steel with vacuum insulation for 6+ hours of heat retention with an average heat loss of only 3°F per hour
- 6. Spigot** NSF Listed from Tomlinson
- 7. Legs** New lightweight regal legs or original modern legs available

REPLACEMENT PARTS

Lid knob, lid gasket, splash guard, handles, NSF spigot, base, modern legs, regal legs, wrench, bolt, and gaskets
